Hello again,

The problem could be cornered! I have still the same issue that the G4 compilation fails due to libExpat. I have a 32bit version installed, while G4 wants to install in 64bit. The check for the library presence seems to not check the 64bit compatibility and hence doesn't use the built in version of it.

Thanks to Mohammad. Now we just need a fix for that...

Cheers
Ralf
