
Subject: Kaon lists from PndEventReader::FillList are empty

Hi all,

I recently updated PandaRoot from 13755 to 14281.

Now the FillList function of PndEventReader returns empty lists for "KaonVeryLoosePlus" and "KaonVeryLoosePlus" selection.

In the previous version the very same command worked well and pion selection also still fills the lists.

Can anybody hint me at what might have changed?

Cheers,

Marius
