Hi Mohammad

Many thanks for your quick reply. I have attached the following files here
1. DircDet.zip, is the directory of the detector.
All the .cxx and .h files are inside /DircDet/src/
2. simpletracker.zip. this is the main "detector" (my EIC). i am just using it as a macro from the rutherford example.
3. CMakeLists.txt this is the main cmake lists inside the fairroot/example directory.
4. passive.zip. I told you that my fairpipe was not building properly last time and this is the folder which has all the passive components.

Again, thanks a bunch.
Raghav
