Subject: Re: Pion off Nuclei [quasi-free]

Posted by Johannes Siebenson on Tue, 17 Apr 2012 07:26:35 GMT

Hello Ingo,

do I need latest PLUTO version for that macro? I tried to run it with v5.34 but it does not do its job. There is a message:

Warning in <PNucleusFermiPlugin::Exec>: Syntax error:
Info in <PStaticData::AddDecay>: (ALLOCATION) Decay index 614009: pi- + 12C -> (pi- + p) + 11B (quasi-free)

and i the end there comes a message:
PReaction: calculating widths in PData...
PReaction: insufficient energy
 100% done in 0.009896 sec

Thanks a lot in advance
