Just wanted to add here that i also tried to update pandaroot (so that i can start working on getting to see tracks for my eicdetector by looking at how it is done in panda) and i am getting the same error when building pandaroot:

```
[ 52%] Building CXX object emc/CMakeFiles/Emc.dir/PndEmcContFact.cxx.o
[ 53%] Building CXX object emc/CMakeFiles/Emc.dir/PndEmcDict.cxx.o
/Users/raghav/pandaroot/build/emc/PndEmcDict.cxx: In function 'void
G__cpp_setup_inheritancePndEmcDict()':
/Users/raghav/pandaroot/build/emc/PndEmcDict.cxx:22519: error: 'FairBasePoint' was
not declared in this scope
/Users/raghav/pandaroot/build/emc/PndEmcDict.cxx:22519: error: 'G__Lpbase' was not
declared in this scope
/Users/raghav/pandaroot/build/emc/PndEmcDict.cxx:22519: error: expected
primary-expression before ')' token
/Users/raghav/pandaroot/build/emc/PndEmcDict.cxx:22519: error: expected `;' before
'G__Lderived'
/Users/raghav/pandaroot/build/emc/PndEmcDict.cxx:22531: error: 'FairLinkedData' was
not declared in this scope
....
```

And the funny thing is that it is the same function inside the Dict.cxx file which is showing up will all the problems.
