Subject: Re: New update of fairroot not building properly Posted by Mohammad Al-Turany on Tue, 17 Apr 2012 16:26:50 GMT View Forum Message <> Reply to Message

Hi,

This is due to the last changes (we remove some classes and re-design some),

there is two ways to solve that:

1. in your source directory:

find . -name "\*LinkDef\*" -exec touch {} \;

then call make

2. remove everything in the build directory and call cmake and make again.

regards, Mohammad
