Dear Panda Grid Members,

In this topic I would like to collect all the problems and wishes to be addressed during the 13th Panda Grid Workshop in Thailand.

To start, I will name a few:

1. Problem with using of AliEn.v2-20. At least several users see problems when doing "alien login" with the following message:

```
/red1/sean/alien/alien.v2-20.27/lib/perl5/site_perl/5.10.1/AliEn/UI/Catalogue.pm  
line 571
```

2. Multiple Authn services (if we will not solve it ourselves)

3. Enabling API services (if we will not solve it ourselves)

4. Deletion of files.

Please do report any problems/comments/wishes.

yours

radek
