Dear Albrecht,
     I fixed the part of code which was filling the string in a bad way, so I hope that now the
crash will disappear.
If there are further problems, please let me know.
                         Best regards,
                              Lia.
