Hi,

This time I got a crash at the beginning of the reco macro (start random seed = 26), otherwise all conditions as for the recent crashes.

The digi macro has finished normally and has correct size (18.5 MB):

Macro finished succesfully.

Output file is evt\_digi\_stt.root

Parameter file is evt\_params\_stt.root

Real time 1849.92 s, CPU time 1847.09 s

The reco log file is attached. What does it mean:

```
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
```

```
locf_() Warning: changing base from 7f2c00000000 to 7f2d00000000!!!
```

```
This may result in program crash or incorrect results
```

```
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
```

I have never had this before.

Best regards,

Albrecht
