Dear all,

Please find below a first concept for the program of the computing week. I also placed some names of experts to the relevant topics. Hence, I would also like to have the feed-back from those who find their name in the program. Comments, suggestions, corrections, input, etc... are welcome!

Greetings,

Johan.

Monday

9-12 arrival

14-17 "Overall framework structure"

Overview of the framework - Florian/Radek

Panda data structure - Stefano

Tuesday

9-12 "Software development, howto"

9-11 How to write decent (panda) code? - Tobias

11-13 Collaborative and code development tools - Florian

14-17 "PandaRoot event reconstruction"

STT - Lia

EMC - Dima

MVD - Tobias

GEM - Radek

FS - Elisa

Wednesday

9-12 "Tracking algorithms and code design" - Lia

14-17 "PID and analyses software, algorithms and code design"

PID framework - Stefano/Mohammad B.

Analysis framework - Klaus G.

Thursday

9-12 "How to run your physics channel and do a physics analysis"

Generators - Bjoern

Analysis tutorial - Klaus

14-17 "time-structured simulations" - Tobias

Friday

9-12 "Workgroup formation" - Johan.

14 Departure
