Subject: Re: pp->K0s+X with V5.34 Posted by Jia-Chii Chen on Wed, 30 May 2012 14:36:50 GMT View Forum Message <> Reply to Message

Hi Ingo,

I'm sorry, there is nothing wrong with V5.34. I found the mistake in the binning in my post-Pluto-analysis.

By the way, right now I don't need K\*896, Sigma1385 or Lambda1520 for the K0s cocktail. But it's still good to know, that they are not automatically included and how to include them.

Thank you, however, for the fast response and sorry again.

Best regards,

Chii
