Hi Florian,

I have solved the problem cmemnting out in file generators/CMakeLists.txt\_pythia6 the following lines:

```
#Set_Source_Files_Properties(${Pythia_FSRCS} PROPERTIES COMPILE_FLAGS  
#                               ${UnderScoreString})
```

Unfortunately with the problem of geant3 svn I cannot go further in compilation. Let's wait...
