Subject: Re: My updated fairtools library not loading
Posted by Raghav Kunnawalkam on Tue, 26 Jun 2012 16:16:07 GMT

Hi Stefano

Thanks for that, i was creating it but not actually calling it. After that it still gave me some problems regarding another fairtrack symbol but that went away after i loaded my fairtrkbase library. I think that i am getting the hang of this library loading business now.

So now the programs runs past the libraries stage and it is getting stuck when it tries to create a digi file.

Processing eic_reco.C...
MCFile : data/eic_tau_p_without_selection.mc.root
DigiFile: data/eic_tau_p_without_selection_mc_digi.root
RecoFile: data/eic_tau_p_without_selection_mc_reco.root
FairRootManager::OpenOutFile("data/eic_tau_p_without_selection_mc_reco.root ")
  -- --------
-------------- actual containers in runtime database ------------------------
-------------- runs, versions --
run id
  container   1st-inp   2nd-inp   output
-------------- input/output --
first Input:
OBJ: FairParRootFile data/params_tau_p_without_selection.mc.root : 0 at: 0x7f847973ca60
Root file I/O data/params_tau_p_without_selection.mc.root is open
detector I/Os: FairGenericParIo
second input: none
output:
OBJ: FairParRootFile data/params_tau_p_without_selection.mc.root : 0 at: 0x7f847973ca60
Root file I/O data/params_tau_p_without_selection.mc.root is open
detector I/Os: FairGenericParIo
Error in <TFile::TFile>: file data/eic_tau_p_without_selection_mc_digi.root does not exist
[FATAL] [26.06.2012 12:11:01] [FairRootManager.cxx::AddFriendsToChain:1754] Error opening the file InputChain which should be added to the input chain or as friend chain
[FATAL] We stop the execution of the process at this point.
[FATAL] For later analysis we write a core dump to core_dump_91051

this is what is happening right now and i will keep working on it and update you guys if i find something. I also attached the reco macro (which is basically the one in pandaroot)

Cheers
Raghav
