Hi,

Normally the packages in the fairsoft are consistence, so if you change ROOT to the newest trunk for any reason, you should not expect that everything will run out of the box! and the changes you did to the VMC had to be send to CERN and not to us.

WHy you need to go to newest ROOT? and what beef is there with 4.6.3? and what about the jan12 externals do you have problems compiling them with the 4.6.3?

Mohammad
