Hi Mohammad

UPDATE:: I got it working now, It was just a simple path mistake.
Thanks for your help.

When i installed fairsoft, i selected the option of installing them in their source directories itself.

Here is the log file from my last installation:

OpenGL found on this system

C++ compiler found in PATH

*** Compiling the external packages with the GCC compiler

*** Building the libraries with best optimization

The following parameters are set.

System : 64bit

C++ compiler : g++

C compiler : gcc

Fortran compiler : gfortran

CXXFLAGS : -O3

CFLAGS : -O3

Compiler : gcc

Debug : no

Optimization : yes

Platform : macosx

Architecture : macosx64

G4System : Darwin-g++

g4_data_files : yes

g4_get_data : no

Number of parallel

processes for build : 4

Found cmake version 2.8.7 which is newer than the
required version 2.8.2 in PATH

This version is okay. Don't install cmake as external package.

*** Package gtest is OK ***

*** Package glpk is OK ***

*** Package gsl is OK ***

*** Package Boost is OK ***

*** Package ApMon is OK ***

*** Package ml-gsoapclient is OK ***

*** Package Pythia6 is OK ***

*** Package pythia8 is OK ***

*** Package Clhep is OK ***

*** Package Geant4-Source is OK ***

*** Package Geant4-lib is OK ***

**** Installing the Geant4 data files ****

*** Package G4EMLOW already unpacked ***

*** Package G4NDL already unpacked ***

*** Package RadioactiveDecay already unpacked ***

```

*** Package PhotonEvaporation already unpacked ***
*** Package G4ABLA already unpacked ***
*** Package RealSurface already unpacked ***
*** Package G4NEUTRONXS already unpacked ***
*** Package G4PII already unpacked ***
*** Compiling root .....
Copied rootconfig.sh .....
Configure Root .....
*** root compiled successfully ***
*** Package pluto is OK ***
*** Package Geant3 is OK ***
*** Package VGM is OK ***
*** Package Geant4_VMC is OK ***
*** End installation of external packages without Errors***

```

It says that geant4 is installed properly. I think that there is something wrong with my libraries path.

This is the output that you asked for, in the source directory fairsoft.

```
raghav:fairsoft raghav$ svn info
```

```
Path: .
```

```
URL: https://subversion.gsi.de/fairroot/fairsoft/trunk
```

```
Repository Root: https://subversion.gsi.de/fairroot
```

```
Repository UUID: 0381ead4-6506-0410-b988-94b70fbc4730
```

```

```

```
Last Changed Date: 2012-04-16 08:13:00 -0400 (Mon, 16 Apr 2012)
```

Cheers

Raghav

UPDATE::

I played around with the libraries and copied the geant4-config file to the spot that it wanted and now it looks like it can see geant4 or atleast most of it.

I am having some problems regarding specific files, namely the data file for low energy EM processes. I tried getting the new data file and unpacked it and placed it in the place of the old one (even though i think that they are both the same), i am still getting the same issues.

```
----- input/output -----
```

```
first input: none
```

```
second input: none
```

```
output:
```

```
