Hi Mohammad

UPDATE:: I got it working now, It was just a simple path mistake.  
Thanks for your help.

When i installed fairsoft, i selected the option of installing them in their source directories itself.

Here is the log file from my last installation:

OpenGL found on this system

C++ compiler found in PATH

\*\*\* Compiling the external packages with the GCC compiler

\*\*\* Building the libraries with best optimization

The following parameters are set.

System : 64bit

C++ compiler : g++

C compiler : gcc

Fortran compiler : gfortran

CXXFLAGS : -O3

CFLAGS : -O3

Compiler : gcc

Debug : no

Optimization : yes

Platform : macosx

Architecture : macosx64

G4System : Darwin-g++

g4\_data\_files : yes

g4\_get\_data : no

Number of parallel

processes for build : 4

Found cmake version 2.8.7 which is newer than the  
required version 2.8.2 in PATH

This version is okay. Don't install cmake as external package.

\*\*\* Package gtest is OK \*\*\*

\*\*\* Package glpk is OK \*\*\*

\*\*\* Package gsl is OK \*\*\*

\*\*\* Package Boost is OK \*\*\*

\*\*\* Package ApMon is OK \*\*\*

\*\*\* Package ml-gsoapclient is OK \*\*\*

\*\*\* Package Pythia6 is OK \*\*\*

\*\*\* Package pythia8 is OK \*\*\*

\*\*\* Package Clhep is OK \*\*\*

\*\*\* Package Geant4-Source is OK \*\*\*

\*\*\* Package Geant4-lib is OK \*\*\*

\*\*\*\* Installing the Geant4 data files \*\*\*\*

\*\*\* Package G4EMLOW already unpacked \*\*\*

\*\*\* Package G4NDL already unpacked \*\*\*

\*\*\* Package RadioactiveDecay already unpacked \*\*\*

```

*** Package PhotonEvaporation already unpacked ***
*** Package G4ABLA already unpacked ***
*** Package RealSurface already unpacked ***
*** Package G4NEUTRONXS already unpacked ***
*** Package G4PII already unpacked ***
*** Compiling root .....
Copied rootconfig.sh .....
Configure Root .....
*** root compiled successfully ***
*** Package pluto is OK ***
*** Package Geant3 is OK ***
*** Package VGM is OK ***
*** Package Geant4_VMC is OK ***
*** End installation of external packages without Errors***

```

It says that geant4 is installed properly. I think that there is something wrong with my libraries path.

This is the output that you asked for, in the source directory fairsoft.

```

raghav:fairsoft raghav$ svn info
Path: .

Last Changed Date: 2012-04-16 08:13:00 -0400 (Mon, 16 Apr 2012)

```

Cheers  
Raghav

UPDATE::

I played around with the libraries and copied the geant4-config file to the spot that it wanted and now it looks like it can see geant4 or atleast most of it.

I am having some problems regarding specific files, namely the data file for low energy EM processes. I tried getting the new data file and unpacked it and placed it in the place of the old one (even though i think that they are both the same), i am still getting the same issues.

```

----- input/output -----
first input: none
second input: none
output:
OBJ: FairParRootFile /Users/raghav/fairroot/example/EIC/macros/data/params_test_A_C.root
