Hi Radek,

I don't know what went wrong, but if I download the package from the location suggested by Mohammad, I get gcc 4.8.0.

```
demac015:bin uhlig$ ./gfortran -v
Using built-in specs.
COLLECT_GCC=./gfortran
COLLECT_LTO_WRAPPER=/Users/uhlig/Downloads/usr/local/bin/./libexec/gcc/x86_64-apple-darwin11.4.0/4.8.0/lto-wrapper
Target: x86_64-apple-darwin11.4.0
Configured with: ../gcc-4.8-20120603/configure --enable-languages=fortran
Thread model: posix
gcc version 4.8.0 20120603 (experimental) (GCC)
```

Please try to do it again. The instructions how to do it can be found at

<http://hpc.sourceforge.net/>

Ciao

Florian
