ok Andre', I understand.

We can try then the following alternative way (that almost never works in actuality).

When you have time and possibility you please send me the root files you produced in generation and digitization and I try and see if I can reproduce your crash thanks in advance

Gianluigi

André Goerres wrote on Wed, 25 July 2012 09:26Hello Gianluigi,

sorry, but since this is my private notebook, I'm not feeling comfortable with giving other persons access to it.

I will have a look if I can find more information for the reason of the crash. If I find something, I will post it here.

Thanks anyways.
