Hello,

I am attempting to install pluto++ on a Mac OSX Lion.

For the plug PSaidLowEnergy, I get the following error.

```
plugins/scatter_mod/PSaidLowEnergy.cc:201: error: call of overloaded 'pow(long double, double&)' is ambiguous
/Users/Mike/root/include/TMath.h:390: note: candidates are: double pow(double, double)
```
