Subject: Re: Repeat: jan12 SSL lib problem during root compilation at scientific linux 5.3 64bit
Posted by Dmitry Morozov on Mon, 06 Aug 2012 06:28:02 GMT

I've finally installed it. I just changed the node. Strange thing is that node also have SL 5.3 installed. As far as I know the only difference with the prevoius one is that old node has some additional staff for root proof. Maybe it has some more differences unknown to me..

So the bottom line - SL 5.3 64 bit is suitable for jan12 externals and PandaRoot...

Thanks.
Dmitry.
