Hi,

I just removed the dev:latest from the grid sites.... to add and modify dependencies etc via packman is presently difficult, so that I leave up to the next grid workshop. Also be aware that I could not modify the crontabs on the various grid sites, which contain the a call to Dashboard. Cron will therefore now complain on each grid site, but that is not so bad. In any case, the sites will not post to the dashboard anymore...

Greetings,

Johan.
