Subject: Problem in installing fairsoft jan12 Posted by Ajay Kumar on Tue, 28 Aug 2012 12:02:28 GMT

Hi,

I have downloaded the fairsoft (jan12 version)through svn command. Since Geant4 is downloaded while we are configuring using the command ./Configure.sh. Somehow it is not downloading GEANT4 and giving error (see attached file).

After that I downloaded all those files directly from the http://geant4.cern.ch/support/source and kept it in "transport" directory. But I was not able to install either way.

What is the solution?

Ajay
