Hello,
in this forum we will discuss subjects of general concern.

Of course will need more forums. I'd like to ask for proposals.

My primary suggestion:
- SCADA Systems, e.g. PVSS II, EPICS, LabVIEW etc.
- Middleware, e.g. CORBA, J2EE etc.
- Fieldbusses, e.g. Profibus, CAN etc.
- Savety
- Software Development
- Hardware Development

and forums for each experiment and accelerator and one forum for common control system subjects.

Holger
