I have uploaded the file Ntuple\_EtaHist.root. I am running the macro with  
model->SetNpy->(500) now. I will report back on the finding as soon as its complete.

I would like to note to whomever reads this and uses the Ntuple\_EtaHist.root, that  
Ntuple\_EtaHist.root is very preliminary histograms. The data used to obtain these histograms  
can be obtained at [durham database](#)
