Subject: Re: DPM weird t spectrum (random problem) Posted by StefanoSpataro on Mon, 17 Sep 2012 16:13:27 GMT View Forum Message <> Reply to Message

I found strange that with a higher binning the effect disappears, while with a worse binning you can see such obscillations, are you sure you don't have some bug in the macro? Maybe something connected with rounding?

However, Aida Galoyan is doing the DPM manteinance, so maybe you can contact her, I am not sure of she reads the forum.
