

Dear all,

I am running PandaRoot rev. 17558 with sep12 external packages on Ubuntu 12.04.

I run official the macros from macro/run.

I have commented out the DIRC and set FTS to inactive in sim_complete.C with:

```
FairDetector *Fts= new PndFts("FTS", kFALSE); // FTS is inactive
```

Until pid macro everything is looking good for 1000 events, but the pid macro does not run.
Here is what I think is the essential part of the output.

Toggle Spoiler

```
I- FairGeane::FairGeane: Geane is Initialized  
[INFO ] Branch: FtsIdealGenTrack not found in Tree  
[INFO ] Branch: FtsIdealGenTrack not found in Tree

[INFO ] The number of entries in chain is 1000  
[INFO ] The number of entries in chain is 1000
```

For a diff I have attached the outputs of the pid macro when I run the entire simulation chain with active FTS (withFTS.txt) and with inactive FTS (noFTS.txt).
