Dear all,

while compiling the PandaRoot using Mai2011 external packages with the newest version of drc/PndDrcHitProducedIdeal class, I get the following error:

[65%] Building CXX object drc/CMakeFiles/Drc.dir/PndDrcHitProducerIdeal.cxx.o

/u/mpatsyuk/PANDA/trunk/drc/PndDrcHitProducerIdeal.cxx: In member function 'virtual void PndDrcHitProducerIdeal::Exec(

/u/mpatsyuk/PANDA/trunk/drc/PndDrcHitProducerIdeal.cxx:147: error: invalid use of incomplete type 'struct TGeoMatrix'

/d/panda01/mpatsyuk/mai11/may11/tools/root/include/TGeoShape.h:22: error: forward declaration of 'struct TGeoMatrix'

make[2]: *** [drc/CMakeFiles/Drc.dir/PndDrcHitProducerIdeal.cxx.o] Error 1

make[1]: *** [drc/CMakeFiles/Drc.dir/all] Error 2

make: *** [all] Error 2

What should I do to able to use these old external packages with the newest PndDrcHitProducerIdeal class?

Best regards,
Maria
