Subject: Re: Tracking + Truth Match Problem Posted by Tobias Stockmanns on Thu, 22 Nov 2012 08:30:50 GMT View Forum Message <> Reply to Message

Dear Klaus,

you could use the event display to see which hit points are part of the track. With this method you can see if there are just different combinations of points from one track assigned to different tracklets.

With a track merger one should be able to reduce this effect.

Cheers,

Tobias
