Dear Stefano and Florian,
Firstly, as suggested by Stefano, I tried removing pid and rho folders from build but it doesn't helped me and I am still with same error.
and now about gcc, here is my versions for gcc and gfortran

Manoj$ gcc --version
i686-apple-darwin10-gcc-4.2.1 (GCC) 4.2.1 (Apple Inc. build 5664)

Manoj$ gfortran --version
GNU Fortran (GCC) 4.6.1

Any suggestions on this?

Regards
