---

Hi there and best wishes for 2013!

I try to run macro/run/sim\_complete.C using the UseEvtGenDirect.

My .dec file looks like this:

noPhotos

```
Decay pbarpSystem
 1.0 J/psi pi+ pi- PHSP;
Enddecay
```

End

Running this results in the error message:

```
root.exe:
/vol0/panda/pandasep12/pandaroot/pgenerators/EvtGen/EvtGenBase/EvtIntervalFlatPdf.cc:19:
EvtIntervalFlatPdf::EvtIntervalFlatPdf(double, double): Assertion `max >= min' failed.
```

If I replace the "J/psi" by a "phi" everything works.

What is the problem here?
