Hi,

I have successfully installed pandaroot in Suse 11.1 system.

As a beginning I start to look macros in /pandaroot/macro/run/ dir.

but while running root -l sim_complete.C, it is giving following error:

```
root [0]
```

```
Processing sim_complete.C...
```

```
Error: Symbol FairRunSim is not defined in current scope sim_complete.C:33:
```

```
Error: Symbol FairRunSim is not defined in current scope sim_complete.C:33:
```

```
Error: type FairRunSim not defined
```

```
FILE:/home/bhatt/PANDA/pandaroot/macro/run/./sim_complete.C LINE:33
```

```
Warning: Automatic variable FairRunSim*fRun is allocated sim_complete.C:33:
```

```
Error: Undeclared variable FairRunSim*fRun sim_complete.C:33:
```

```
*** Interpreter error recovered ***
```

I tried other macro as well but getting similar error.

Is there anything else I need to do in order to run this macros.

Regards,

Himani
