Subject: Re: Problem in runing macro /macro/run/sim_complete.C Posted by Himani Bhatt on Thu, 17 Jan 2013 08:54:21 GMT View Forum Message <> Reply to Message

While giving ./config.sh command it shows:

System during compilation: Welcome to openSUSE 11.1 - Kernel r (I). x86_64 System now : Welcome to openSUSE 11.1 - Kernel r (I). x86_64

and when I run the code it gives:

bhatt@ikp398:~/PANDA/pandaroot/macro/run> root -I sim_complete.C root [0] Processing sim_complete.C... Error: Symbol FairRunSim is not defined in current scope sim_complete.C:33: Error: Symbol FairRunSim is not defined in current scope sim_complete.C:33: Error: type FairRunSim not defined FILE:/home/bhatt/PANDA/pandaroot/macro/run/./sim_complete.C LINE:33 Warning: Automatic variable FairRunSim*fRun is allocated sim_complete.C:33: Error: Undeclared variable FairRunSim*fRun sim_complete.C:33: *** Interpreter error recovered *** root [1]

One thing I found when I give source check_system.sh in buildpanda dir myself, it is giving such statement:

bhatt@ikp398:~/PANDA/pandaroot/buildpanda> source check_system.sh System during compilation:

System now : Welcome to openSUSE 11.1 - Kernel r (I).

x86_64

You try to run the software on a different

linux flavour than it was compulled on.

This is normaly a serious error, so we stop

the execution at this point.

If you know what you do you can change the

config.sh script to bypass this security issue.
