Subject: Root from externalpackage sep12 cant find libASImage.so
Posted by Simone Esch on Fri, 22 Mar 2013 10:41:35 GMT

Hello!

I have installed sep12 external packages on my MacBook and I have a problem with root. The installation was finished without errors, but When I open root and I open anything with grafics (TCanvas, TBrowser etc.) root crashes:

Simones-MacBook-Pro:~ simone$ root
root [0] new TBrowser
dlopen error: dlopen(/Users/simone/fairroot/external_packages/sep12_build/lib/root/lib
ASImage.so, 9): Library not loaded: /opt/local/lib/libpng14.14.dylib
  Referenced from: /Users/simone/fairroot/external_packages/sep12_build/lib/root/libASImage
.so
  Reason: image not found
Load Error: Failed to load Dynamic link library
/Users/simone/fairroot/external_packages/sep12_build/lib/root/libASImage .so
Error in <TCint::AutoLoad>: failure loading library libASImage.so for class TASImage
Error in <TPluginHandler::SetupCallEnv>: class TASImage not found in plugin ASImage
Error in <TGVSplitter::TGVSplitter>: splitterv.xpm not found
Error in <TGHSplitter::TGHSplitter>: splitterh.xpm not found
Error in <TGComboBox::TGComboBox>: arrow_down.xpm not found
Error in <TGVScrollBar::TGVScrollBar>: arrow_*.xpm not found

 *** Break *** segmentation violation

The file libASImage.so links to libASImage.5.34.so. Both files exists.

Can someone help me?

OS X 10.8.2
externalpackages sep12 rev 17045

Thank you

Simone
