Hi all,

I updated my pandaroot environment (svn update) and I found the following error:

...

...

[54%] Generating PndTrackingDict.cxx, PndTrackingDict.h

Scanning dependencies of target Tracking

[54%] Building CXX object tracking/CMakeFiles/Tracking.dir/PndTrkLegendreFits.cxx.o

[54%] Building CXX object tracking/CMakeFiles/Tracking.dir/PndTrkTracking.cxx.o

/home/garzia/sep12/pandaroot/tracking/PndTrkTracking.cxx: In member function 'void PndTrkTracking::Initialization_ClassVariables()':

/home/garzia/sep12/pandaroot/tracking/PndTrkTracking.cxx:308:15: error:

'fnParContigue' was not declared in this scope

/home/garzia/sep12/pandaroot/tracking/PndTrkTracking.cxx:311:15: error:

'fListParContiguous' was not declared in this scope

/home/garzia/sep12/pandaroot/tracking/PndTrkTracking.cxx: In member function 'virtual InitStatus PndTrkTracking::Init()':

/home/garzia/sep12/pandaroot/tracking/PndTrkTracking.cxx:617:2: error:

'fnParContigue' was not declared in this scope

/home/garzia/sep12/pandaroot/tracking/PndTrkTracking.cxx:618:2: error:

'fListParContiguous' was not declared in this scope

make[2]: *** [tracking/CMakeFiles/Tracking.dir/PndTrkTracking.cxx.o] Error 1

make[1]: *** [tracking/CMakeFiles/Tracking.dir/all] Error 2

make: *** [all] Error 2

I had a look into the code and seems that "fnParContigue" and "fListParContiguous" are not defined (in PndTrkTracking.h).

Can somebody fix it?

Thanks in advance,

Isabella
