Dear Tobias,

from my point of view in the eventDisplay.C script:

```
FairMCPointDraw *EMCPoints = new FairMCPointDraw ("EmcHit",kOrange, kFullSquare);
```

needs to be replaced by

```
FairHitPointSetDraw *EMCPoints = new FairHitPointSetDraw ("EmcHit",kOrange,  
kFullSquare);
```

Otherwise, all the shown EmcHits are located at the origin, as an effect of bad casting.

Cheers,
Philipp
