Subject: Lambda-Disk geometry

Posted by Tobias Stockmanns on Fri, 05 Apr 2013 13:24:17 GMT

Dear PandaRooters,

I have updated the geometry file for the Lambda disks (option with two disks at 45 and 55 cm) and the macro to create the geometry (in /mvd/MvdMC). The old geometry file had a problem in reconstructing the hits properly.

The files are called: CreateLambdaGeometry.C and LambdaDisksNew.root

Have a nice weekend

Tobias
