Subject: Problems installing external packages Apr13 on Suse 12.2
Posted by Tobias Stockmanns on Wed, 10 Apr 2013 14:04:45 GMT

Dear PandaRooters,

we try to install the external packages on our Suse 12.2 installation. Unfortunately ZeroMQ and Millepede do not get installed properly.

The log output for ZeroMQ is:

*** Compiling zeromq ....
*** Unpacking zeromq-3.2.2.tar.gz ....
*** ERROR: zeromq could not be created.
*** End installation of external packages with Errors***

For Millepede there is no log output and no files are created.

In Suse 11.4 ZeroMQ is compiled but the library version is 3.0.0 which is in contradiction to the given version 3.2.2.

On Suse 11.4 Millepede is also missing.

I hope someone has an idea how to fix this.

Cheers,

Tobias
