Changelog V6:

Thank you Elisa, I corrected the angle.

I also made several important corrections based on suggestions from professor Smyrski.

Additionally, I moved the long text in the captions to the main text and made some additional minor text adjustments.

I added a reference for the "time based simulation".

Comments:

Version 6 is fairly complete

I plan to add two pictures of the Hough spaces for line and for parabola.

I might add a short paragraph on the Hough transform for a line.

Everything else should be "final" unless I receive corrections, suggestions or change requests.

[Old version was removed]
