Subject: Re: PndSttMvdGemTrackingIdeal: Tracks with MVD and GEM, but without STT... Posted by Simone Esch on Thu, 18 Apr 2013 09:43:25 GMT View Forum Message <> Reply to Message

Hello Stefano,

the tracks I am talking about do hit the MVD, GEM and FST and leave hits there, but still this tracks are not listed in the candidate list of the ideal track finder. I am not sure if the FTS is taken into account.

Best regards

Simone
