I extract folder manually but it gives same error.  
Even I observed that during Installation it unpack the glpk but gives the error like "glpk could not be created." and stop the installation.

Directory: home/buildp  
Found cmake version 2.8.6 which is newer than the  
required version 2.8.6 in PATH  
This version is okay. Don't install cmake as external package.  
\*\*\* Compiling gtest .....  
\*\*\* Package gtest already unpacked \*\*\*  
\*\*\* gtest compiled successfully \*\*\*  
\*\*\* Compiling glpk .....  
\*\*\* Unpacking glpk-4.39.tar.gz .....  
\*\*\* ERROR: glpk could not be created.  
\*\*\* End installation of external packages with Errors\*\*\*
