Subject: Re: New external package release apr13 Posted by Bhavin Patel on Sat, 20 Apr 2013 08:22:38 GMT View Forum Message <> Reply to Message

I extract folder manually but it gives same error. Even I observed that during Installation it unpack the glpk but gives the error like "glpk could not be created." and stop the installation.

Directory: home/buildp Found cmake version 2.8.6 which is newer than the required version 2.8.6 in PATH This version is okay. Don't install cmake as external package. *** Compiling gtest

- *** Package gtest already unpacked ***
- *** gtest compiled successfully ***
- *** Compiling glpk
- *** Unpacking glpk-4.39.tar.gz
- *** ERROR: glpk could not be created.
- *** End installation of external packages with Errors***
