Hey guys, I'm having trouble running event display. I'm trying to use fairbase as is without any modifications, so I don't understand why it is not working. I have tried using both the sep12 and april13 external packages, but I have had no luck. This is the error message that I get:

```
root -l eventDisplay.C
```

```
root [0]
```

```
Processing eventDisplay.C...
```

```
FairRootManager::OpenOutFile("data/test.root")
```

```
[INFO ] The input consists out of the following trees and files:
```

```
[INFO ] - cbmsim
```

```
[INFO ] - data/test.mc.root
```

```
-l- name parset # FairBaseParSet
```

```
-l- RTDB entries in list# 1
```

```
[INFO ] Parameter and input file are available, Assure that basic info is there for the run!
```

```
[INFO ] The number of entries in chain is 10
```

```
[INFO ] Branch: EventHeader. not found in Tree
```

```
[INFO ] Branch: EventHeader. not found in Tree
```

```
[INFO ] No event Header was found!!!
```

```
[INFO ] Branch: EventHeader. not found in Tree
```

```
