Subject: Pandaroot apr13 release on the GRID
Posted by StefanoSpataro on Tue, 30 Apr 2013 07:57:28 GMT

Dear all,
since the new pandaroot release "apr13" is ready, it would be nice to have installed it on the grid. It is still linked with the sep12 external packages.
Can somebody create the new package and install it?

Since all the pandaroot packages have some bug inside (oct12, nov12) while the last release should be stable enough to run properly analysis, I think it is important to use apr13 as a standard for the next months.
