Dear all,

I try to compile macro for lmd and got following errors, which are independent from lmd macros:

```
../../../../lib/libBase.so.0.0.0: undefined reference to `FairRunAnaProof::RunOneEvent(long long)'  
../../../../lib/libPndData.so.0.0.0: undefined reference to `FairTrackPar::FairTrackPar(FairTrackPar  
const&)'  
../../../../lib/libBase.so.0.0.0: undefined reference to `FairRunAnaProof::FairRunAnaProof(char  
const*)'
```

FairRunAnaProof I don't see in any CMakeList. Is it ok?  
For FairTrackPar I have no idea what can be wrong.  
Can experts have a look at those classes, please?

Best regards,  
Anastasia.
