Hi Mohammad,

I am trying to switch over to the new tag 13.05

I tried `svn co https://subversion.gsi.de/fairroot/fairbase/tags/v-13.05`

but get the following error:

svn: E175002: The OPTIONS request returned invalid XML in the response: XML parse error
at line 1: Extra content at the end of the document

(<https://subversion.gsi.de/trac/fairroot/fairbase/tags/v-13.05>)

Do you know what may possibly be the cause?

Best,

Raphael
