I was using the PndEvtGenDirect with evtGen->SetStoreTree(kTRUE).

Its reproducible via:

```
theAnalysis->FillList(MC_Truth,"McTruth");  
  
for (int j=0;j<MC_Truth.GetLength();j++)  
    cout<<MC_Truth[j].GetMcMotherIdx()<<endl;
```

It would be nice if its set, since PndMcTruthMatch uses the MotherIdx a lot.
