dear Radek,
yes, deleting the Params.root file and rerunning fixed the problem, thank you
Gianluigi

Radek Karabowicz wrote on Fri, 31 May 2013 23:35Dear Gianluigi,
You probably have already run the simulation with the old version of the code, updated the
trunk, and want to run the simulation again.
Well, there has been so many changes in fairbase, that the params.root files are no longer
compatible. You have 2 options:
1/ delete the MvdStt_Params.root,
2/ change the TString parOutput to something else,
and run again.

Did it help?

yours
