Sure:

http://panda-wiki.gsi.de/pub/Computing/Minutes27May2013/20130527_cmakeli_sts.pdf

In theory in this way everything should be done automatically (hopefully). please update your cmakefiles, and if it is still producing errors write here so that we can check. However, I feel this depends on the old structure, since all the other cmakefiles are organized in a different way now. Radek did not check the cmake files not included in the global compilation, this is the reason why you have still the old scheme.
