Sure:

[http://panda-wiki.gsi.de/pub/Computing/Minutes27May2013/20130527\\_cmakelists.pdf](http://panda-wiki.gsi.de/pub/Computing/Minutes27May2013/20130527_cmakelists.pdf)

In theory in this way everything should be done automatically (hopefully). please update your cmakefiles, and if it is still producing errors write here so that we can check. However, I feel this depends on the old structure, since all the other cmakefiles are organized in a different way now. Radek did not check the cmake files not included in the global compilation, this is the reason why you have still the old scheme.
