Subject: [FIXED] DPM
Posted by Simon Reiter on Wed, 03 Jul 2013 21:38:24 GMT

Hi all,

I used DPM generator to get some background statistics. In my analysis script I did n MC match to identify pions correctly. Additional I checked the MotherID to 88888 (pbarp-system) to know, how many of them decayed in the primary decay. But this check seems not to work as if there is no information stored.

Greetings
Simon

PS: Using Release April '13
